PLS LOGISTICS SERVICES LAUNCHES EXPANDED SHIPPING PLANNING CAPABILITIES

PLS PRO SystemSM provides more options and flexibility to support customers' and carriers' logistics needs

PITTSBURGH (November 23) – PLS Logistics Services, the leader in technology-based third party logistics solutions, today announced the launch of PLS PRO System, expanding the scope of its web-based proprietary Transportation Management System. PLS PRO replaces PLS' *eflatbed.com*, and gives customers and carriers the advantage of planning more of their shipping and transportation needs with a single interface.

In addition to supporting flatbed transportation, PLS PRO will manage shipments through van, truckload, LTL (less-than-truckload), barge and rail. Customers will also enjoy the enhanced look and easy navigation of the system, as well as all of the core functionality they are accustomed to with *eflatbed*.

"We are excited to deliver this expanded technology to the user base, one that provides deeper planning and dispatch capabilities," said John Gallardo, President and CEO, PLS Logistics Services. "PLS is committed to broadening its range of services and technology to support the growing needs of our customers and carriers. With PLS PRO, we now give them the flexibility to handle all commodity types and shipping modes – not just flatbed," Gallardo said.

For more information about PLS PRO System, call 724-709-2305, or visit www.plslogistics.com.
